GreenRub Farm **33**

Almailem Group is completing nearly 60 years as a leader in Kuwait's Automotive industry. Our story is one of grit, passion and determination. From a single tire shop to a reputed footprint in retail and corporate distribution business today, we have established ourselves through tireless service, quality, competitive pricing, dedicated staff and the goodwill of our loyal customers.

Green Rubber Recycling Co. is the green arm of Almailem Group, where we have strongly placed our commitment, passion and drive towards environment sustainability. Our multinational team is focused and motivated in developing and creating products best suited to an ever-changing market, even adapting to consumer requests.

Our commitment is to be sincere to our customers as well as to the environment that nurtures us...

A close-up photograph of a yellow conveyor belt moving a large quantity of small, dark, irregularly shaped granules. The granules appear to be a byproduct of tire recycling.

Our dedication to the ecosystem is an important part of our business ethos. Driven by this mission, we have invested in state of the art European origin machinery to find effective quality solutions and applications to recycle used tires.

Old tires are not only guaranteed engagement in a **circular economy**, but find new life under young and exuberant feet.

GreenRub Play

Kids will be kids. Whether they are climbing up, sliding down, or running around the playground, they are likely to fall down or lose their balance - it is a part of growing up. The fear of falling and hurting oneself should never restrict the joy of play. It is up to us to ensure their utmost safety and well-being.

With a variety of sizes and vibrant colours, GreenRub Play tiles guarantee the highest safety standards on playgrounds by reducing the impact and thereby decreasing the risk of injury in case of accidental falls.

Code	Colour	Size (mm)	Thickness (mm)
STLRD05040	Red	500 x 500	40

STLGN05060	Green	500 x 500	60
STLBK05060	Black	500 x 500	60

USAGE BENEFITS

- Suitable for indoor or outdoor applications
- Enhanced comfort and safety
- Non-slip surface
- Resilient in all climates
- Easy installation
- Low maintenance

Availability ranges:
100% SBR rubber coloured granules or EPDM-topped tiles.

Outdoor playground

Indoor play area

There can be no compromise when it comes to the safety of our children. This is why we have implemented a very strict quality control for every single stage of the manufacturing process. The MDI binders are premium quality and crumb rubber is carefully selected and sorted by size.

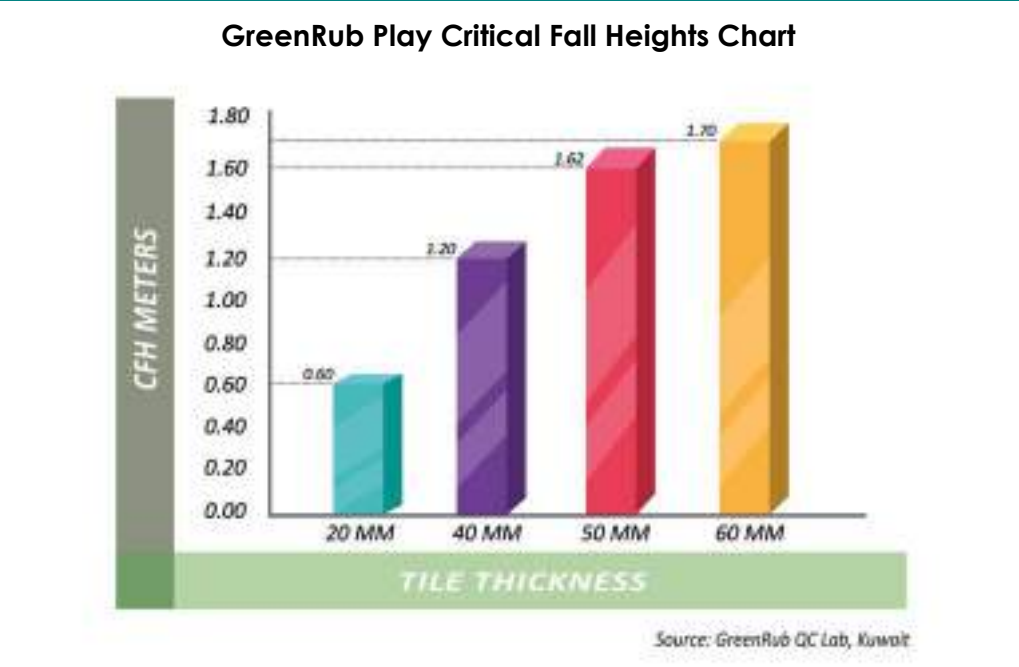

Our modern technological laboratory is equipped to carry out tests not only for the standard certification of products but also upon the request of our clients.

The HIC (Head Injury Criterion) test is one of the most effective way to measure the probability of head injury occurring from the impact with a surface.

With our technically advanced Impact Testing System, we are able to perform accurate tests on playground flooring in order to determine the HIC value.

All our GreenRub Play tiles are tested and certified in accordance with DIN EN1177 and ASTM F-1292.

Our commitment to technical excellence and comprehensive quality control ensures that you can sit back and relax while watching your kids enjoy themselves.

GreenRub Urban

GreenRub interlocking tiles provide an environmentally-friendly outdoor and indoor flooring solution as well as an ideal alternative to cement brick pavers. This product has a versatile application in commercial, residential, general recreation and public spaces.

USAGE BENEFITS

- Suitable for indoor or outdoor applications
- Enhanced comfort and safety
- Non slip surface
- Resilient in most climates
- Easy installation
- Low maintenance

Availability ranges:
100% SBR rubber coloured granules or EPDM-topped files.

Sustainability,
the GreenRub way!

GreenRub Fitness

GreenRub Fitness tiles are the most cost-effective flooring solution for both indoor and outdoor fitness centers. Our range of tiles can be exposed to high mechanical loads and provides superior sound attenuation.

Code	Colour	Size (mm)	Thickness (mm)
STFBK10010	Black	1000 x 1000	10
STFRD10010	Red	1000 x 1000	10
STFBK05015	Black	500 x 500	15
STFRD05015	Red	500 x 500	15
STFBK10020	Black	1000 x 1000	20
STFRD10020	Red	1000 x 1000	20
STFBK10040	Black	1000 x 1000	40

STFBK05040	Black	500 x 500	40
STFRD05040	Red	500 x 500	40

USAGE BENEFITS

- Safety for athletes in the event of a fall
- Microfracture prevention
- Less stress on the joints
- Great grip
- Subflooring protection

Available in a wide variety of thicknesses, colours and materials combination (full SBR, SBR and EPDM with speckled effect, EPDM or artificial grass top surface).

Upon request, bevelled edges to avoid tripping hazard or puzzle format for an easier installation.

GreenRub tiles for CROSSFIT or FREE WEIGHTS areas are designed with an increased density to maximize the impact absorption. They guarantee an increased rebound control compared to normal surfaces, with the aim of providing safety to all athletes and people doing sports and gymnastic movements.

Code	Colour	Size (mm)	Thickness (mm)
CFBKX10015	Black	1000 x 1000	15
CFRDX10015	Red	1000 x 1000	15
CFBKX10020	Black	1000 x 1000	20
CFRDX10020	Red	1000 x 1000	20
CFBKX10030	Black	1000 x 1000	30
CFRDX10030	Red	1000 x 1000	30

GreenRub Infill

GreenRub SBR material is used as an infill for synthetic turf sports fields. It stabilizes the artificial grass in an upright position providing performance features similar to the natural grass field. For heavy traffic areas, GreenRub infill prevents the grass from being patted down by offering a firmer support, providing cushioning and rebounding feature.

The standard size of the GreenRub Infill is 0.8 - 2.5mm. Additionally, upon customer's request, we can manufacture a wider range of sizes and colours.

Code	Colour	Size (mm)
SBRBK08025	Black	0.8 - 2.5
SBRRD08025	Red	0.8 - 2.5
SBRCN08025	Green	0.8 - 2.5

USAGE BENEFITS

- Shock-absorption and foot stability to protect athletes
- Softer artificial grass and perfect bounce
- Moisture drainage
- Dust and mud reduction
- Environment Friendly

GreenRub Farm

GreenRub Farm tiles are an animal-friendly surface providing an enhanced comfort while standing or lying down in the stable. This flooring solution also provides an economical benefit in the practical utilization of the stable by minimizing the use of bedding as well as man-power.

The tiles can be utilised also to protect the vertical walls on the washing areas, boxes or trailers.

Code	Colour	Size (mm)	Thickness (mm)
FABKX10020	Black	1000 x 1000	20
FARDX10020	Red	1000 x 1000	20
FAGNX10020	Green	1000 x 1000	20
FABKX10030	Black	1000 x 1000	30
FARDX10030	Red	1000 x 1000	30
FAGNX10030	Green	1000 x 1000	30
FABKX10040	Black	1000 x 1000	40
FARDX10040	Red	1000 x 1000	40
FAGNX10040	Green	1000 x 1000	40

USAGE BENEFITS

- Slip resistance
- Protection for tendons and joints
- Noise Insulation
- Less maintenance required

Other applications

Green Rubber Recycling Co. supplies raw materials as well as pour in place (PIP) service for seamless rubber flooring. Available in a variety of colours and material combinations for different applications: sports field, running tracks, walkways.

Custom design

Every project comes with a challenge. Our technical team is providing tailored solutions with custom shapes, engravings or colour combination for a unique flooring which combines safety and aesthetics.

GreenRub Puzzle tiles can be used for multiple applications: play areas, therapy centers, fitness and yoga studios, pools or sidewalks.
